

AZURE SECURITY ANALYSIS

Axelliant's Azure Security Analysis Approach

- Collaborate to align with key IT and Business strategies to enable and protect the business through security best practices
- Gather and analyze data
- Identify and evaluate areas at risk or for improvements
- Categorize and prioritize findings based upon criticality
- Provide recommendations to mitigate risks and improve security posture

High-level Analysis of Common Risk Areas

- 1 Identity and Access Management
- 2 Logging, Auditing, and Alerting
- 3 Web Application vulnerabilities
- 4 General Network Security
- 5 Storage Access and Encryption
- 6 Backup and Recovery
- 7 Availability and Resiliency

THE AXELLIANT AZURE SECURITY ANALYSIS WILL ...

Provide findings and recommendations for areas at risk or improvement

Deliver actionable guidance for any identified risks or improvement opportunities

Prioritize findings based upon criticality

Communicate the impact of the findings as well as the recommendations

HOW CAN WE HELP?

Align best-practice remediation and improvement recommendations with business and IT goals

Provide meaningful and actionable guidance along with an understanding of risk and remediation impacts

Leverage the Axelliant Azure Security Analysis offer annually, as an Axelliant CSP Azure customer, to manage and maintain an improved security posture

Engage with Axelliant Consulting to provide services for implementing recommended remediation and improvements
